RE: GatorBar – FRP Rebar

To whom it may concern,

GatorBar FRP rebar has been presented to the City of Arlington. The City is interested in pursuing its application in various projects such as parking lots and sidewalks on private property. Until this trial period is complete, the City of Arlington has no objection to the use of GatorBar FRP rebar for reinforcing concrete for shrinkage and crack control.

The City of Arlington will accept private plans that utilize GatorBar in these applications.
